5. AI HR STRATEGY ENGINE

6. TRAINING NEEDS ANALYSIS (TNA)

7. PAYROLL AUTOMATION ENGINE

8. PERFORMANCE MANAGEMENT ENGINE

AI RECRUITER ENGINES

1. Purpose

To automate talent decisions using structured job data, employee data, and AI-driven scoring.

2. Scope

Applies to:

External hiring

Internal mobility

Succession planning

Promotions

3. Inputs

Job Description (from JD Engine)

Candidate CVs / employee profiles

Performance data

Competency framework

Business rules (eligibility, tenure)

4. Process Steps

A. Hiring SOP

- HR creates vacancy request
- System retrieves approved JD
- AI generates job advertisement
- CVs are uploaded or integrated
- System extracts CV data (skills, experience)
- AI scores candidates vs JD
- System ranks candidates
- AI generates interview questions
- Interview feedback is collected **VIDEOS**
- AI generates hiring recommendation
- HR confirms or overrides decision

AI RECRUITER ENGINES

4. Process Steps

B. Internal Mobility SOP

- Internal role is published
- System scans employee profiles
- Skills and competencies are matched
- AI scores role fit
- Skill gaps are identified
- Recommendation report generated

C. Succession SOP

- HR defines critical roles
- System retrieves performance & competency data
- AI identifies successors
- Readiness level is assigned

4. Process Steps

D. Promotion SOP

- Promotion cycle initiated
- System validates eligibility rules
- Performance history reviewed
- AI generates promotion score
- Recommendation submitted for approval

5. Outputs

Ranked candidate lists

Mobility recommendations

Succession matrices

Promotion justification reports

AI RECRUITER ENGINES

FLOW DIAGRAM

- VACANCY CREATED
 - FETCH JOB DESCRIPTION
 - RECEIVE CVS
 - SCORE CANDIDATES CVS/DATA VS JD
 - RANK CANDIDATES
 - GENERATE INTERVIEW QUESTIONS
 - SCHEDULE AND CONDUCT INTERVIEWS
 - COLLECT FEEDBACK
 - GENERATE HIRING RECOMMENDATION
-

AI JOB DESCRIPTION GENERATOR

1. Purpose

To create accurate, industry-aligned job descriptions.

2. Scope

New roles and role updates.

3. Inputs

Job analysis questionnaire

Industry classification

4. Process Steps

- **Manager completes job analysis form**
- **System structures inputs**
- **AI generates JD draft**
- **JD benchmarked against industry standards**
- **Validation rules applied**
- **HR reviews and approves**
- **JD stored with version control**

5. Outputs

Job description (multiple formats)

Competency list

KPIs per role

AI JOB DESCRIPTION GENERATOR

FLOW DIAGRAM

- LAUNCH SURVEYS
- COLLECT RESPONSES
- NORMALIZE DATA
- SCORE DOMAINS
- APPLY VALIDATION RULES
- ASSIGN MATURITY LEVEL
- GENERATE GAP ANALYSIS

EMPLOYEE LIFECYCLE AUTOMATION

1. Purpose

To automate employee entry, movement, and exit processes.

2. Scope

All employee lifecycle events.

3. Inputs

Employee status changes

Role & department data

4. Process Steps

A- Preboarding

- **Candidate marked as hired**
- **Offer letter generated**
- **Contract generated and signed**
- **Employee data collected**

B- Onboarding

- **Onboarding checklist created**
- **Tasks assigned to HR, IT, Manager**
- **Orientation scheduled**
- **Probation period tracked**

EMPLOYEE LIFECYCLE AUTOMATION

C- Offboarding

- **Exit initiated**
- **Asset & access checklist triggered**
- **Exit interview conducted**
- **Final payroll initiated**

5. Outputs

Lifecycle records

Compliance logs

Exit summaries

EMPLOYEE LIFECYCLE AUTOMATION

FLOW DIAGRAM

- CANDIDATE HIRED
- GENERATE OFFER & CONTRACT
- COLLECT EMPLOYEE DATA
- CREATE ONBOARDING CHECKLIST
- TRACK TASK COMPLETION
- PROBATION TRACKING
- (IF EXIT) → OFFBOARDING FLOW

AI HR STRATEGY ENGINE

1. Purpose

To generate a data-driven HR strategy aligned with business goals and market conditions.

2. Scope

Annual or ad-hoc HR strategy planning.

3. Inputs

Company objectives

Industry & growth plans

Workforce analytics

Org Maturity results

4. Process Steps

- **HR inputs company strategy data**
- **System retrieves workforce metrics**
- **System retrieves maturity assessment results**
- **AI analyzes alignment gaps**
- **AI defines HR strategic pillars**
- **Strategic initiatives are generated**
- **HR KPIs are mapped**
- **12–24 month roadmap is created**
- **Strategy document generated**

5. Outputs

HR strategy document

Strategic pillars

KPIs

Roadmap

AI HR STRATEGY ENGINE

FLOW DIAGRAM

- COLLECT COMPANY STRATEGY
- FETCH WORKFORCE METRICS
- FETCH ORG MATURITY SCORE
- AI GAP ANALYSIS
- GENERATE HR PILLARS
- DEFINE HR INITIATIVES
- GENERATE KPIS & ROADMAP

ORGANIZATIONAL MATURITY ASSESSMENT (OMA)

1. Purpose

To assess organizational readiness and define improvement priorities.

2. Scope

Company onboarding and annual review.

3. Inputs

Survey responses (HR, managers, employees)

Process & system data

4. Process Steps

- **System launches surveys**
- **Responses collected and stored**
- **AI scores qualitative inputs**
- **Domain scores calculated**
- **Consistency rules applied**
- **Overall maturity level assigned**
- **Gaps identified**
- **Improvement actions generated**
- **Results sent to HR Strategy Engine**

5. Outputs

Maturity level (1–5)

Domain heatmaps

Gap analysis

Improvement roadmap

ORGANIZATIONAL MATURITY ASSESSMENT (OMA)

FLOW DIAGRAM

- LAUNCH SURVEYS
- COLLECT RESPONSES
- NORMALIZE DATA
- SCORE DOMAINS
- APPLY VALIDATION RULES
- ASSIGN MATURITY LEVEL
- GENERATE GAP ANALYSIS

TRAINING NEEDS ANALYSIS (TNA)

1. Purpose

To identify and prioritize learning needs based on performance data.

2. Scope

Annual and ad-hoc TNA cycles.

3. Inputs

Performance results

JD competencies

Manager TNA forms

4. Process Steps

Performance data retrieved

Skill gaps identified

Manager inputs analyzed

Training priorities ranked

Learning paths recommended

Development plans created

5. Outputs

TNA report

Learning roadmap

Individual development plans

TRAINING NEEDS ANALYSIS (TNA)

FLOW DIAGRAM

- FETCH PERFORMANCE RESULTS
- FETCH JD COMPETENCIES
- ANALYZE SKILL GAPS
- RANK TRAINING PRIORITIES
- GENERATE LEARNING ROADMAP

PAYROLL AUTOMATION ENGINE

1. Purpose

To calculate and process payroll accurately and compliantly.

2. Scope

Monthly payroll cycles and final settlements.

3. Inputs

Employee master data

Attendance & leave data

Salary structures

Tax & labor rules

4. Process Steps

Payroll cycle initiated

Data validation performed

Gross salary calculated

Deductions & taxes applied

Net pay calculated

Anomalies flagged

Payslips generated

Bank & accounting files generated

Payroll archived

5. Outputs

Payslips

Tax reports

Accounting journals

Audit logs

TRAINING NEEDS ANALYSIS (TNA)

FLOW DIAGRAM

- INITIATE PAYROLL CYCLE
- VALIDATE EMPLOYEE DATA
- CALCULATE GROSS PAY
- APPLY DEDUCTIONS & TAX
- NET PAY CALCULATION
- GENERATE PAYSLEIPS
- GENERATE BANK & ACCOUNTING FILES

PERFORMANCE MANAGEMENT ENGINE

1. Purpose

To manage performance cycles objectively and consistently.

2. Scope

All employees and review cycles.

3. Inputs

HR strategy

Job descriptions

Organizational goals

4. Process Steps

HR defines performance framework

Goals cascaded to roles

KPIs generated per role

Review cycle launched

Reviews collected

Bias detection applied

Calibration executed

Final ratings approved

5. Outputs

Scorecards

Performance ratings

Analytics reports

PERFORMANCE MANAGEMENT ENGINE
